

## CHEMISTRY

For over 5 billion years, earth has had water existing in three physical states. The composition of water on earth has remained constant irrespective of the fact that water is consumed by organisms for its various uses.

### **TASK:**

**Comment about the above statement as a student of chemistry.**

Wako beverages is planning to introduce a new juice product on the market and also register it with the Uganda registration services bureau (URSB), but the owner has found it necessary to first conduct a market survey in order to establish the response of customers.

### **Task:**

- a) Given any five challenges they are likely to face during the exercise
- b) Advise Wako beverages on the benefits of letting URSB know their business.
