

GEOGRAPHY

Students of Citizen High school conducted a field work study of the area around their school. They visited places such as Ibanda Hill and Kasonso Village. During their field study, they took photographs and interviewed people about the economic activities they do and the challenges they face. They found out that the major activity was crop farming. Other activities included trade and stone quarrying. After the study, students wrote the report.

TASK

Carryout the fieldwork study of your home areas. Prepare and present a report to the teacher including the topic of study, objects of study, methods used while collecting information.
